# Project Design and Outline

Figure 1

Project Management API

What you need to answer (per the grading criteria)

- 3 pages

- UML diagram X

- Outline demonstrates strong progress on the Portfolio Project and

  includes the

  - project scope;

    - This includes the design *how* and how it will work with

      blockchain.

- ○ goal alignments; -- Include this in scope. Need to address that API will work with a blockchain API to track project activities on a blockchain network. The infrastructure exists in an enterprise blockchain as a service solution for creating and hosting a blockchain business network.
- ○ potential change requests.
    - ■ where the network is hosted. The network can be hosted on another cloud solution (besides IBM Cloud) if desired.
    - ■ Client may request that activity or project attributes are added or removed.
- ○ timeline estimates for inception, delivery, and maintenance;

Scope

The design and how it will work with blockchain. And how it will work with blockchain API.

Reference your other 2 portfolio milestone for notes, what to write and links to articles for descriptions/explanations to write etc .
