4 pages - start writing long discussion post. Starts with introduction explaining the problem at hand and how leadership required.

THIS IS MOST OF THE PAPER FROM THE PMBOK GUIDE YOU HAVE PLENTY OF MATERIAL TO WORK WITH:
Communications management, stakeholder management, resource management, quality management, and schedule management in **Part 1 PMBOK Guide**

Include at least two scholarly references in addition to the course textbook.

For the critical thinking assignments:
After I select an option I break down the instructions and ask myself:
- what questions do I have to answer?
- what specific answers does the professor want me to give? Are the answers in the text?
- Also I've found the PMBOK guide to be really helpful in describing processes.

- Project Management Institute. (2017). Part 1: A guide to the project management body of knowledge (PMBOK® guide): 3. The role of the project manager. In *A guide to the project management body of knowledge® (PMBOK® guide).* (6th ed.). (pp. 51-68). PMI Publications.

Feedback from last paper:

You provided for a well-written and well organized paper focusing on project management and product guaranteeing. You did a very strong job on this submission!

Option #2: **New Server Rollout**

Communication is vital between stakeholders, project managers, and operational managers within the organization. There are few people who have the capacity to understand all phases of the plan or what each individual piece of an organization does.

At the end of the day, each faction of the organization should have the same goal, which is the success of the project and the organization. However, as noted in Chapter 2 of Siegel (2019), vision and methods are not always unified.

You have recently been placed in charge as a project manager for the deployment of new servers to replace older servers on the network. The servers are part of the sales, research, and development team for your company and the core business process, which brings in 70% of your organization's revenue.

As a project manager, discuss the possible issues arising from opposing motivations within the organization.

What sort of leadership skills (management skills) are necessary to ensure that individuals can be appropriately guided and motivated towards the goal of completing and executing the project strategy?

What sort of leadership strategy would you employ to ensure the successful completion of this rollout? - describe how you would manage see above

Discuss methods that would allow this rollout to be successful without impacting the systems or the individuals working on them.

- what questions do I have to answer?
- what specific answers does the professor want me to give? Are the answers in the text?

Communications management, stakeholder management, resource management, quality management, and schedule management in **Part 1 PMBOK Guide**

PMBOK GUIDE

Start writing communications management discuss briefly stakeholder and resource management.

You are in control of this. Answer the questions and write 3 pages. The introduction and conclusion counts as 1 page. The introduction introduces the problem the conclusion summarize the information.

6.4.1.2 PROJECT DOCUMENTS

Project documents that can be considered as inputs for this process include but are not limited to:

◆ **Activity attributes.** Described in Section 6.2.3.2. Activity attributes may describe defined predecessor or successor relationships, as well as defined lead and lag and logical relationships between the activities that may impact duration estimates.

◆ **Activity list.** Described in Section 6.2.3.1. The activity list contains all schedule activities required on the project, which are to be estimated. Dependencies and other constraints for these activities can influence the duration estimates.

◆ **Assumption log.** Described in Section 4.1.3.2. Assumptions and constraints recorded in the assumption log may give rise to individual project risks that may impact the project schedule.

◆ **Lessons learned register.** Described in Section 4.4.3.1. Lessons learned earlier in the project with regard to effort and duration estimating can be applied to later phases in the project to improve the accuracy and precision of effort and duration estimates.

◆ **Milestone list.** Described in Section 6.2.3.3. The milestone list may have scheduled dates for specific milestones that may impact the duration estimates.

◆ **Project team assignments.** Described in Section 9.3.3.2. The project is staffed when the appropriate people have been assigned to the team.

◆ **Resource breakdown structure.** Described in Section 9.2.3.3. The resource breakdown structure provides a hierarchical structure of the identified resources by resource category and resource type.
